Job Description

Full-Stack Technical Consultant | Tokyo

We are looking for an experienced **Full-Stack Engineer / Technical Consultant** who can combine hands-on development with business requirements, customer communication and solution design.

Role & Responsibilities

- Work with Japanese business stakeholders to understand business challenges and requirements
- Translate business ideas into PoC / MVP solutions
- Design and develop full-stack applications, APIs and cloud-based solutions
- Apply AI / GenAI, automation or other emerging technologies where appropriate
- Prepare solution architecture, data flow and integration approaches
- Coordinate with offshore engineering teams and internal stakeholders
- Present prototypes/demos to customers and incorporate feedback

Additional Information

???? **Location:** Tokyo

???? **Salary:** Up to ¥12M

???? **Employment:** Full-time

Work Authorization: Valid Japan work authorization required

???? **Work Style:** Hybrid

A great opportunity for a Full-Stack professional looking to move beyond development and work at the intersection of **Technology, Business and AI**.

Required Skills

Requirements

- 7–10 years of Full-Stack / Software Development experience
 - Strong experience across Front-end and Back-end development
 - Experience with technologies such as React / Next.js / TypeScript, Node.js / Python
 - Experience with APIs, databases and cloud technologies
 - Experience in **Retail / E-commerce / Consumer-facing projects**
 - Experience in business requirements, consulting, solution design or customer-facing roles
 - Experience developing **PoC / Prototype / MVP / Demo solutions**
 - Practical exposure to **AI / GenAI / ML / automation**
 - Japanese communication skills at **N1/N2 level or equivalent**
 - Bachelor's degree in Computer Science, Engineering or related field
