Job Description

Our client specializes in building advanced gas flow control and monitoring systems used in semiconductor manufacturing industries with the aim to significantly enhance fab productivity and capital efficiency with our innovative solutions.

Job Descriptions

- Supervise and coordinate shift-based assembly line activities, manpower allocation, and operational workflow to hit production targets.
- Monitor assembly processes and equipment operations to minimize downtime and optimize output.
- Enforce adherence to quality standards, collaborating with QA/QC teams to resolve defective assembly issues promptly.
- Lead, train, and mentor operators on assembly work instructions, equipment usage, and workplace safety.

- Handle line troubleshooting and coordinate setup, tooling requirements, and routine maintenance schedules with relevant departments.
- Drive scrap reduction and participate in continuous improvement initiatives to improve cost efficiency.

Job Requirements

- Diploma or Degree in Mechanical Engineering, Manufacturing Engineering, or a related technical discipline.
- Minimum 3 years of supervisory experience in assembly, mechanical operations, or general manufacturing.
- Candidates with relevant experience in Mass Flow Controller (MFC) assembly, manufacturing, testing, or related operations are preferred.
- Solid understanding of assembly workflows, line balance, production line troubleshooting, and ERP/production management software.
