Job Description

Company Overview

A leading high-tech manufacturing organization serving global industries, committed to innovation, operational excellence, and advanced manufacturing technologies. The company offers a dynamic environment where IT plays a critical role in supporting production, engineering, cleanroom operations, and digital transformation initiatives. The working location is in Senai, Johor,

Key Responsibilities

- Lead and manage IT infrastructure, networking, cybersecurity, and data center operations to ensure high system availability and business continuity.

- Oversee enterprise networks, servers, cloud environments, virtualization platforms, and security systems.
- Support manufacturing-related IT systems including ERP, MES, SCADA, and operational technology (OT) connectivity.
- Drive infrastructure upgrades, digitalization projects, vendor management, and technology implementation initiatives.
- Lead and mentor the IT team while ensuring compliance with corporate standards, cybersecurity requirements, and audit regulations.

Job Requirements

- Bachelor's Degree in Information Technology, Computer Science, Computer Engineering, or a related field.
- Minimum 8 years of experience in IT infrastructure and networking, including at least 3 years in a managerial or leadership role.
- Strong expertise in Windows/Linux servers, Cisco networking, cloud platforms (Azure/AWS), virtualization, and cybersecurity.
- Experience supporting manufacturing, semiconductor, electronics, or high-tech production environments is highly preferred.
- Professional certifications such as CCNP, CISSP, CISM, VCP, ITIL, or PMP will be an added advantage.
- Strong leadership, project management, problem-solving, and stakeholder management skills.
