Job Description

Role Summary

Seeking a Production Manager with experience in agrochemical formulations, plant operations, process scale-up, and contract manufacturing. The role involves managing commercialization, manufacturing execution, troubleshooting, and coordination with production partners.

Key Requirements

- 10+ years of experience in agrochemical formulation manufacturing.
- Graduate degree in a relevant field (Diploma/B.Sc./M.Sc./Chemical Engineering).
- Experience in herbicide, insecticide, or fungicide manufacturing.
- Knowledge of EC, SC, WP, and WG formulations.

- Familiarity with plant operations, technology transfer, BMRs, and production documentation.
- Willingness to travel across India.

Key Responsibilities

- Lead formulation scale-up from lab to commercial production.
- Coordinate pilot trials, process optimization, and technology transfer activities.
- Manage contract manufacturing partners and plant operations.
- Monitor production, quality checks, material flow, and dispatch activities.
- Ensure compliance with SOPs and manufacturing standards.
- Drive process improvements, troubleshoot operational issues, and conduct RCA for deviations.
- Experience in production of agrochemical formulations including WG, SC, EC, OD, and WP.
- Skilled in batch manufacturing, mixing, milling, granulation, drying, and packaging of agrochemicals.
- Hands-on experience in operating bead mills, mixers, granulators, and dryers.
- Knowledge of formulation processes, SOP compliance, quality standards, and production documentation.
- Experienced in process monitoring, yield improvement, troubleshooting, and EHS compliance in agrochemical plants.
- Expertise in manufacturing pesticide, herbicide, fungicide, and insecticide formulations.
