Job Description

You will be reporting directly to the CTO Japan, and responsible for leading the strategy, delivery, and continuous enhancement of end-user technology services that enable an exceptional Digital Employee Experience (DEX) across the organization.

This role provides leadership and oversight for a broad portfolio of employee-facing technologies and services, including endpoint management, virtual desktop platforms, workplace collaboration tools, voice and unified communications, and multimedia services. The position is accountable for ensuring the delivery of secure, reliable, and high-performing technology solutions that empower employees to work efficiently and effectively across diverse environments.

Working closely with business, technology, and security stakeholders, You will drive service modernization initiatives, optimize technology adoption, and enhance user satisfaction through innovative workplace solutions. The role also plays a key part in strengthening the organization's cybersecurity posture by proactively addressing evolving technology risks and integrating security best practices across end-user platforms and services.

The ideal candidate brings strong leadership experience, deep expertise in end-user computing and workplace technologies, and a proven track record of driving operational excellence, service transformation, and employee-centric technology innovation within a complex, global enterprise environment.

Employee Benefits:

Flexible Hours: Includes a flex-time policy and shortened working hours for parents raising children. Hybrid working policy for all employees.

Time Off: National holidays, annual paid leave, special consecutive leave, and refreshment leave

Comprehensive Insurance: Full social insurance coverage, alongside access to group and supplemental in-house insurance products.

Employee Assistance Programs: Mental health services and well-being perks

Financial Benefits: Performance-based annual bonuses are typically offered alongside commute expense reimbursement.

Special Discounts: Discounts on travel and English language lessons

A modern, functional environment featuring a cafe area, relaxation rooms, and game spaces.

Required Skills

Around 15 years of progressive experience in infrastructure, end-user computing, identity management, or information security domains.

Demonstrated success in a Director-level or equivalent leadership role, with readiness to advance to an Executive strategic accountability.

Proven experience leading following enterprise-scale functions:

End user technology (PC/Mobile/Collaboration), device management, and asset lifecycle

Endpoint security and vulnerability management initiatives

Vendor and service provider management

Experience managing large teams (direct and indirect), including managers and technical leads.

Track record of delivering outcomes in complex, regulated organizations (financial services experience a strong advantage).

Technical Skills & Expertise

Deep understanding of enterprise endpoint environments (Windows, macOS, iOS/Android) , management platforms such as Intune, JAMF, SCCM, or similar, and collaboration platforms(M365, Teams and MS Teams phone)

Strong knowledge of vulnerability management frameworks, remediation principles, patching governance, and security controls.

Familiarity with security and risk management frameworks (NIST, ISO 27001, CIS) and regulatory expectations relevant to financial institutions.

Experience in Technical Audit management

We provide specialized proactive recruitment support to multinational clients who are setting up new operations or are expanding existing business and seeking further growth in the Japanese market. As the first Japanese recruitment company to set up operations in the UK in 1975, understanding foreign cultures is second nature to us. With our extensive global network and historically leading position as a recruitment consultancy to Japanese corporations, we have access to an unrivaled pool of bilingual Japanese and foreign professionals. Our professional consultants are experts in a range of industries and functions and all have extensive multicultural experience. Based on JAC's unique history, culture and market strength, JAC International was founded to provide dedicated support to our multinational corporate clients in Japan.
