Job Description

Job Responsibilities

- Implement and maintain Quality Assurance & Quality Control (QAQC) procedures for M&E works.
- Review and verify Inspection & Test Plans (ITP), method statements, and quality documentation.
- Conduct inspections for mechanical and electrical installations to ensure compliance with project specifications and approved drawings.
- Monitor site activities and workmanship quality.
- Coordinate with consultants, subcontractors, and project teams on quality-related matters.
- Prepare and maintain QAQC reports, inspection records, material approvals, and test reports.
- Ensure all M&E works comply with local regulations, industry standards, and project requirements.

- Participate in testing, commissioning, and final handover inspections.
- Identify non-conformance issues and follow up on corrective and preventive actions.
- Support project teams in achieving quality objectives and timely project completion.

Requirements:

- Diploma or Degree in Mechanical Engineering, Electrical Engineering, Building Services Engineering, or related disciplines.
- Minimum 3-8 years of QAQC experience in construction projects.
Experience in M&E systems including HVAC, Electrical, Fire Protection, Plumbing & Sanitary, and ELV systems.
- Familiar with QAQC procedures, ITP, method statements, material inspections, and testing & commissioning activities.
- Knowledge of ISO standards and quality management systems will be an added advantage.
- Good communication and coordination skills.
- Able to work independently and under tight project schedules.

Preferred Industry Background

- Building Construction
- Industrial Facilities
- Data Centre Projects
- Commercial & High-Rise Buildings

Location: Nilai, Negeri Sembilan. Candidates with experience in large-scale building, industrial, or data centre projects are highly encouraged to apply.
