Job Description

Company Overview: One of the leading Japanese construction company having industrial projects in PAN India location.

Job Overview: Looking for environmental engineers having strong experience working at construction sites for industrial projects.

Job Responsibilities:

- Ensure project activities comply with applicable environmental laws, permits, consent conditions, client requirements, and company standards.
- Maintain an up-to-date register of applicable environmental legal and other requirements.
- Coordinate with the admin department and track environmental permits, consents, approvals, renewals, and conditions applicable to the project.
- Implement and monitor the Project Environmental Management Plan, method statements, and environmental procedures.

- Immediately report any significant non-compliance or regulatory concerns to management.
- Identify environmental aspects and impacts associated with construction activities and recommend suitable controls.
- Ensure proper segregation, collection, storage, transportation, and disposal of solid, hazardous, and construction waste.
- Monitor chemical and waste storage areas and ensure containers are suitable, labelled, covered, and maintained in good condition.
- Maintain records of waste generation, movement, recycling, treatment, and disposal through authorized agencies.
- Monitor and control dust, emissions, noise, vibration, wastewater, spills, and other potential sources of pollution.
- Investigate environmental spills/incidents and coordinate containment, cleanup, reporting, and corrective actions.
- Participate in internal, client, consultant, and regulatory environmental audits and inspections.
- Prevent soil contamination through proper handling and storage of fuel, oil, chemicals, and other hazardous materials.
- Ensure environmental documents are properly controlled, updated, and readily available for inspection.

Job Requirements:

- **Degree/Diploma in Environmental Engineering, Environmental Science** , or a related field.
- Must have experience working on **industrial projects at construction sites**.
- Knowledge of applicable environmental legislation and construction environmental management requirements.
- **Certification in ISO 14001:2015**.
