Job Description

Job Summary

The Data Center Team is seeking an engineer to oversee the operation and management of infrastructure environments, including on-premises and cloud environments within Japan.

In this role, you will work across a wide range of technical areas—including networking, servers (Windows/Linux), virtual environments, storage, backup, and cloud (AWS, Azure, etc.)—and be responsible for the operation and improvement of hybrid environments.

You will also be responsible for supporting implementation, migration, and operational design for the following ongoing infrastructure renewal projects.

Job Responsibilities:

Nutanix/Cisco UCS Deployment Support:

- Support for the deployment of Nutanix-based virtual infrastructure and Cisco UCS servers
- Support for deployment and operational launch in collaboration with vendors (Cisco, Net One Systems)
- Support for migrating virtual machines from the existing VMware environment to Nutanix

Backup Infrastructure (Veeam) Deployment Support:

- Support for the design and implementation of a backup environment using Veeam
- Support for integrating backups into the new virtual infrastructure (Nutanix)

Support for upgrading or decommissioning servers running end-of-life operating systems

- Support for upgrading or decommissioning end-of-life OS servers (Windows/Linux)
- Inventory of target servers and support for migration planning

Cloud Infrastructure Operation and Optimization:

- Operational support for AWS, Azure, Oracle Cloud, etc.
- Organization of AWS accounts and support for global integration

Preparation for and migration support for the next infrastructure update

- Preparation and migration support for the next infrastructure update at Fujitsu data centers
- Reviewing configurations to reduce vendor lock-in

Support for migrating the consolidated file server to NetApp:

- Preparation and support for migrating the consolidated file server from Dell to NetApp

Required Skills

Certifications and qualification:

- Degree in an IT-related field or equivalent knowledge and experience
- 5+ years of data center or infrastructure operations experience
- Basic knowledge of virtual infrastructure (VMware, Nutanix, etc.)
- Basic knowledge of servers and storage
- Experience operating Windows and Linux servers
- Basic knowledge of cloud platforms such as AWS and Microsoft Azure

Certifications (Preferred):

- Basic Information Technology Engineer
- LinuC Level 3
- AWS Certified Solutions Architect Associate
- Azure Solutions Architect Expert
- Oracle Database Bronze DBA
- Cisco CCNA (Cisco Certified Network Associate)
