Job Description

An opportunity to join a growing energy business and take a broader role across **electricity markets, trading, procurement and risk management**.

You will work closely with experienced energy-market professionals, analysing market movements and supply-demand conditions and helping shape trading and hedging strategies.

Responsibilities may include:

- Analyse electricity market prices, supply-demand conditions and market trends
- Support and execute power trading and procurement strategies
- Develop hedging approaches to manage market-price exposure
- Evaluate trading opportunities using market and commercial data
- Monitor portfolio performance and changing market conditions
- Work with internal stakeholders on trading, pricing and risk-related decisions

This could suit someone already working in power markets, or a strong **commodity / financial-market professional** interested in developing a career in Japan's electricity sector.

The environment offers considerable scope to learn, broaden your market expertise and take on greater responsibility over time.

Required Skills

- **Required**

- Experience in trading, market analysis, risk management, commodities, energy or another closely related field
- Strong numerical and analytical ability
- Comfortable analysing market prices, supply-demand movements and other commercial data
- **Business-level Japanese or higher**
- **Conversational English**
- Ability to communicate effectively with both commercial and analytical stakeholders
- **Useful experience**
- Electricity or energy-market experience
- Commodity, derivatives or financial-market trading
- Hedging / portfolio risk management
- Electricity procurement or supply-demand management
- Experience working with market data, forecasting or quantitative analysis
