No permission to work in Japan required

Job Description

Location: Laem Chabang, Chonburi

Budget: Total Package 40,000 - 55,000 THB/Month

1. Operate CNC and Specialized Machinery

- Operate CNC Machining Centers, setting up machines according to drawings and assigned programs.
- Adjust parameters and select tools appropriate to the material and type of work.
- Inspect workpiece dimensions and quality to ensure they meet standards.

2. Operate EDM Wire Cut & Laser Welding Machines

- Set up machines and select materials suitable for each job.
- Inspect dimensions, finish, and accuracy of workpieces after cutting.

3. Material Hardness Testing

- Use a Hardness Tester to verify the hardness properties of workpieces.
- Record test results and report them to supervisors and relevant departments.

4. Machine Care and Maintenance

- Perform daily machine condition checks and report any issues.
- Carry out work according to the Preventive Maintenance plan.
- Clean and maintain machines to keep them ready for operation.

5. Program Design and Development

- Design and develop programs for Machining Center, Wire Cut, EDM, and other machines.
- Analyze drawings or part designs to determine appropriate manufacturing processes.
- Select cutting tools and cutting conditions suitable for the machine and material.
- Test and refine programs so that workpieces meet specifications.
- Communicate and coordinate with the U.S. engineering team on program design and development.

6. Technical and Production Support

- Provide technical advice and guidance to engineers and technicians.
- Troubleshoot machine-related problems arising during production.
- Prepare technical documentation such as CNC programs, production reports, and work instructions.
- Support process improvement initiatives to increase efficiency, reduce waste, and lower costs.
- Perform other duties as assigned.

Qualifications:

- Bachelor’s degree in mechanical engineering, Manufacturing/Production Engineering, Mechatronics, or a related field.
- At least 3-5 years of experience in CNC programming and operation.
- Proficient in CAD/CAM software such as Mastercam, SolidCAM, NX, Fusion 360, or similar.
- Knowledge of engineering materials and machining processes.
- Able to read and interpret drawings and engineering plans accurately.
- Good command of English communication. (Coordinate with oversea team)
- **Able to work every other Saturday. (2 Sat per month)**
