Job Description

We are seeking a results-driven Commodity Management Specialist to join our client's procurement and supply chain organisation in Penang. You will own end-to-end commodity management — from strategic sourcing and supplier negotiation to AVL management, cost optimisation and NPI support — ensuring the right materials are secured at the right cost from the right suppliers.

Job Responsibilities:

- Develop and implement PCB sourcing strategies for cost, quality, capacity, and supply continuity.
- Manage global PCB suppliers, including selection, audits, performance, and risk.
- Lead RFQs, cost analysis, negotiations, and cost-reduction activities.
- Resolve supplier issues related to quality, delivery, lead time, and capacity.

- Support engineering and operations on DFM, NPI, material selection, and production transitions.
- Maintain supplier scorecards, cost models, sourcing data, and improvement plans.

Job Requirements:

- Bachelor’s degree in Engineering, Business, or a related field.
- At least 5 years of PCB sourcing or procurement experience in manufacturing.
- Experience managing PCB suppliers, preferably in Taiwan or China.
- Good knowledge of PCB technologies, manufacturing processes, materials, and cost drivers.
- Ability to read PCB technical documents such as Gerber files, drawings, and stack-ups.
- Strong negotiation, analytical, communication, and stakeholder management skills.
