Job Description

COMPANY OVERVIEW

Our client is a well-established multinational manufacturer within the Food & Beverage industry, operating a modern production facility in Johor. The company is looking for a well experienced Senior Production Engineer who is responsible for driving production efficiency, optimizing manufacturing processes, ensuring product quality, and supporting continuous improvement initiatives across the production operations.

JOB RESPONSIBILITIES

- Lead and support daily production operations to achieve manufacturing output, quality, safety, and delivery targets.
- Monitor production performance and drive improvements in productivity, efficiency, yield, and Overall Equipment Effectiveness (OEE).

- Analyze production issues, conduct root cause investigations, and implement corrective and preventive actions.
- Collaborate with Engineering, Maintenance, and Quality teams to improve equipment reliability and process performance.
- Support new product launches, production trials, process validation, and manufacturing scale-up activities.
- Ensure compliance with GMP, HACCP, food safety, quality standards, and company policies.
- Lead continuous improvement initiatives focused on cost reduction, waste minimization, and operational excellence.
- Provide technical guidance, training, and coaching to production personnel while preparing operational reports for management.

JOB REQUIREMENTS

- Bachelor's Degree in Engineering, Manufacturing or related field.
- Preferably with at least 5 years of experience as Production Engineer in Food Manufacturing industry, knowledgeable in food safety standards (i.e. FSSC 22000, GMP HACCP etc.).
- Strong leadership, problem-solving and communication skills.

Interested candidates are welcomed to apply online.
