Job Description

Location

Hanoi

Company Overview

Our client is a well-established multinational technology and telecommunications solutions provider delivering large-scale infrastructure and digital transformation projects across global markets.

Job Responsibilities

- Lead end-to-end project execution, ensuring timelines, milestones, resources, and deliverables are effectively managed.
- Develop comprehensive project roadmaps, implementation schedules, and resource allocation plans to support successful delivery.

- Oversee project scope, service quality, safety standards, and compliance requirements throughout the project lifecycle.
- Coordinate closely with clients, partners, and internal teams to ensure smooth communication and alignment on project objectives.
- Drive stakeholder engagement across departments including commercial, engineering, finance, procurement, HR, and contract management functions.
- Monitor project risks, identify potential bottlenecks, and implement mitigation strategies to maintain project progress and delivery commitments.
- Manage variations, change requests, and commercial discussions while identifying opportunities for business expansion within existing accounts.
- Support bidding and proposal activities by contributing implementation strategies, project plans, delivery methodologies, and service scope recommendations.
- Supervise subcontractors and external vendors, including onboarding, performance management, scheduling, and payment coordination.
- Ensure customer expectations are met through effective project governance and service delivery excellence.

Job Requirements

- Minimum 3 years of experience managing projects within the telecommunications sector.
- Proven track record in network infrastructure or telecom deployment projects, particularly for telecom operators in Vietnam.
- Strong planning, coordination, problem-solving, and stakeholder management capabilities.
- Ability to manage multiple priorities while maintaining a structured and results-oriented approach.
- Familiarity with project management methodologies and best practices; PMP certification is an advantage.
- Proficient in Microsoft Office applications and project planning tools.
- Bachelor's degree in Telecommunications, Information Technology, Electronics
- Engineering, Computer Engineering, or a related discipline.
Strong command of English in both verbal and written communication.

Due to the high volume of applicants, we regret to inform that only shortlisted candidates will be notified. Thank you for your understanding.
