Job Description

【Build Cloud Infrastructure for a Leading Global LifeWear Business】 The hiring company operates the LifeWear business globally, with over 3 trillion JPY in annual revenue and thousands of stores worldwide. Its integrated business model spans product planning, manufacturing, and retail, creating complex digital infrastructure needs across global operations.

【Design and Standardize Multi-Cloud Architecture Across Global Operations】 Design, build, and manage cloud infrastructure using AWS, Azure, and GCP. You will contribute to architecture standardization and deployment approaches that support scalable infrastructure across different environments.

【Support Digital Transformation Through Cloud Architecture】 The company is advancing business transformation by connecting business processes, stores, and digital services through technology. You will contribute to cloud infrastructure initiatives that support this transformation and enable more effective digital operations.

▶ Design, build, and manage cloud infrastructure architectures using AWS, Azure, and GCP.

▶ Drive infrastructure standardization and global deployment initiatives.

▶ Develop automation and improvement initiatives to enhance system stability and efficiency.

▶ Design and manage global content delivery architectures using CDN technologies such as Akamai.

▶ Collaborate with internal teams and stakeholders to support business and system requirements.

Required Skills

Hands-on experience designing and building cloud-based infrastructure architectures independently.

3+ years of experience in IT system design, development, and operations.

Experience with AWS Solution Architect Associate+, Microsoft certifications, Google Cloud Architect, or equivalent skills.

Linux system administration experience.

Experience leading teams, managing projects, or mentoring team members.

Ability to work in a bilingual environment using Japanese and English.

Experience with global cloud infrastructure design and operations.

Experience with OSS-based architecture design and implementation.

Experience with database design/tuning or large-scale systems.

Experience with CDN, traffic management, or DevOps automation.

- Salary: ¥6,560,000–¥14,940,000 / Year
- Employment Type: Permanent
- Location: Tokyo
- Working Style: Hybrid — Up to 2 days WFH/week
- Working Hours: Flexible Working System (Core time 9:00–14:00)
