Job Description

Company Overview: Opening with one of the leading Japanese MNC into engineering and construction industry.

Job Overview:
The mechanical engineer will be responsible for execution of mechanical systems, including HVAC, plumbing, fire protection, and other systems as required at the construction site for industrial projects.

Job Responsibilities:

- **Project Management**:
    - Coordinate with architects, structural engineers, and other stakeholders to integrate mechanical designs with overall project plans.
    - Plan and manage project schedules, budgets, and resources.
      Supervise and provide technical guidance to subcontractors and on-site personnel.
- **Installation and Maintenance**:

- Oversee the installation of mechanical systems, ensuring they are completed on time, within budget, and to the required quality standards.
- Conduct regular site inspections to monitor progress and ensure compliance with specifications and safety standards.
  Implement preventive maintenance programs for mechanical systems.

- **Quality Assurance and Control**:
  - Perform quality control checks on all mechanical systems and components.
  - Troubleshoot and resolve issues related to mechanical systems during construction and post-construction phases.
  - Conduct performance tests and inspections to ensure systems operate efficiently and effectively.
- **Documentation and Reporting**:
  - Maintain detailed records of designs, installations, inspections, and maintenance activities.
  - Prepare and present reports on project status, system performance, and any issues encountered.
  - Ensure all documentation is up-to-date and accessible to relevant stakeholders.
- **Health and Safety**:
  - Ensure all mechanical engineering activities comply with health and safety regulations.
  - Promote a culture of safety on-site and conduct regular safety audits.

Job Requirements:

- Must be mechanical engineering graduate having 6-9 years of hands-on experience working at construction site in Project Execution, Site Execution, Estimation, Drawing, for industrial projects
- Excellent project management skills, with experience managing large-scale construction projects
- Staying at the site location is necessary.
- Self-motivated and highly organized.
- Able to supervise and control the team.
- Ability to work in a group.
- Ability to work under pressure.
- Must be comfortable to work at construction site location
