## Job Description

**Key Responsibilities:**

- Lead the installation and commissioning of production machinery, ensuring all manuals, drawings, and technical documentation are available and complete.
- Manage machine handover processes, verifying equipment performance and operational readiness before transfer to Production.
- Oversee the maintenance and troubleshooting of electrical, electronic, and mechanical systems to ensure uninterrupted plant operations.
- Develop, implement, and monitor preventive maintenance (PM) schedules in coordination with Production, revising plans based on operational requirements.
- Ensure timely execution of PM activities and maintain accurate maintenance records and documentation.
- Minimize machine breakdowns and production downtime through effective troubleshooting, root cause analysis, and

corrective action implementation.

- Ensure availability and proper management of critical spare parts to support maintenance activities.
- Monitor and maintain electrical connections, power distribution systems, and equipment safety standards across the facility.
- Set and optimize machine parameters to meet production and quality requirements.
- Support production teams by ensuring equipment reliability and compliance with quality standards.
- Maintain ISO-related records and represent the Maintenance function during internal and external audits.
- Train operators and production personnel on equipment operation, machine handling, and maintenance best practices.
- Drive continuous improvement initiatives focused on equipment reliability, safety, productivity, and operational efficiency.

**Requirements:**

- Diploma or Degree in Mechanical, Electrical, Electronics, or a related Engineering discipline.
- Minimum 5 years of maintenance experience in a manufacturing environment, including 1-2 years in a supervisory or leadership role.
- Strong knowledge of mechanical, electrical, pneumatic, hydraulic, and electronic systems.
- Proven expertise in preventive maintenance, breakdown analysis, and equipment troubleshooting.
- Good understanding of safety regulations, maintenance systems, and compliance requirements.
- Proficient in Microsoft Office applications and maintenance documentation.
- Strong problem-solving, planning, coordination, and team management skills.
