Job Description

We are seeking an experienced **Data & Analytics Architect** to lead enterprise data architecture, analytics strategy, data engineering, and governance initiatives. The ideal candidate will combine deep technical expertise with strong business ac

This role involves close collaboration with clients and internal stakeholders, solution architecture, pre-sales support, and delivery leadership within a global consulting environment.

Key Responsibilities:

- Advocate client and provide thought leaderships in data analytics and data engineering.
- Understand the requirements both functional and non-functional to define the holistic data management system architecture.
- Demonstrate compelling business values to the client with the data architecture/solution aligning to the business scenarios.
- Collaborate with the internal stakeholders and outline data management standards, guidelines, governing principles, and policies aligning to the client requirements.
- Identify use cases, document process flows, data flows, outline data management approach and define data models.
- Specify data compliance, regulations and access methods aligning to the requirements.
- Data reference architecture and framework creation.
- Pre-sales activities, proposal creation, solution design and project delivery.

Required Skills

Required Qualifications:

- Bachelor's degree or foreign equivalent required from an accredited institution. Will also consider three years of progressive experience in the specialty in lieu of every year of education.
- At least 15 of experience in Information Technology.
- Bilingual communication skills.
- Japan citizens and those authorized to work in Japan are encouraged to apply. We are unable to sponsor at this time.
- At least 10 years of experience in Data analytics architecture and solutions.

Preferred Qualifications:

- At least 10 years of experience in Data analytics architecture, Advanced analytics, Data engineering and Data governance areas.
- Ability to manage large data analytics programs, data design solutions and delivery.
- Experience in tools like Microsoft Fabric, Informatica, Collibra, Talend etc.
- Experience in hyper scalers like AWS. Azure or GCP.
- Excellent verbal and written communication skills.
- Experience in leading teams and managing client expectations.
- Experience in software development life cycle. Agile methodology preferred.
- Ability to work in team in diverse/ multiple stakeholder environment.
- Experience and desire to work in a Global delivery environment.
