Job Description

We are seeking a Senior Software Engineer with strong Java expertise to lead high-level system design and development for a large-scale communication platform. This role focuses on building and enhancing distributed marketing technology solutions, with responsibility across design, development, testing, and operational excellence.

Client Details

Our client is a global technology-driven organisation operating large-scale digital services and customer engagement platforms. The team develops enterprise marketing and communication solutions used to deliver personalised customer experiences at scale.

Description

- Lead the design, development, migration, and testing of communication platform services supporting campaign management, personalisation, segmentation, and marketing automation.
- Build and maintain scalable distributed systems with a focus on performance, reliability, availability, and operational

excellence.

- Enhance software quality through automated testing, AI-assisted development practices, and peer code reviews.
- Document software architecture and collaborate with cross-functional teams to deliver business-critical platform capabilities.

Job Offer

- Opportunity in a well known company
- Free office meals.
- 1 day work from home

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Serina Miyazono on +81 3 6627 6130.

Required Skills

- Has 5+ years of software development experience with strong proficiency in Java.
- Demonstrates hands-on experience with distributed systems, microservices architecture, and modern CI/CD environments.
- Possesses strong problem-solving skills and the ability to lead design activities in complex technical environments.
- Communicates effectively with stakeholders and takes ownership of delivering high-quality software solutions.

Company Description

Our client is a global technology-driven organisation operating large-scale digital services and customer engagement platforms. The team develops enterprise marketing and communication solutions used to deliver personalised customer experiences at scale.
