Job Description

About the Role

We are seeking a Technical Engineer to support engineering, maintenance and continuous improvement activities within a manufacturing environment. This role will focus on equipment reliability, troubleshooting, technical improvements and production support.

Responsibilities

- Provide technical support for production operations and equipment.
- Troubleshoot machinery and process-related issues.
- Assist with preventive maintenance and equipment inspections.
- Drive Kaizen and continuous improvement initiatives.

- Support safety activities and risk reduction measures.
- Maintain technical records and reports.
- Support digitalisation, automation and data management activities.

Requirements

- Degree in Mechanical, Electrical, Mechatronics, Industrial Engineering or a related field.
- 1-3 years' experience in Engineering, Maintenance or Production Engineering.
- Manufacturing experience preferred.
- Strong troubleshooting and analytical skills.
- Good communication and teamwork abilities.
- Proficient in Microsoft Excel and other Microsoft Office applications.
- Proactive, hands-on and eager to learn.

Benefits

- Professional and supportive working environment.
- Meal, housing and transportation support.
- Health check-ups and insurance coverage.
- Uniform provided.
- Additional allowances based on position and service length.

About the Company

Our client is an established manufacturer supplying a diverse range of yarn products to various industrial applications. The company offers opportunities for professional growth and continuous development.
