Job Description

Location: Osaka city (full-time, on-site)

Position Overview

We are looking for a Technical Lead to work on functional improvements of

Java-based enterprise systems. The ideal candidate will communicate

directly with customers in Japanese, understand and organize

requirements, and handle estimation, technical review, task breakdown,

and quality management.

Main Responsibilities

- Understand the business and system requirements of enterprise systems
- Confirm requirements and hold technical meetings with customers in Japanese
- Analyse change requests and verify their technical impact and dependencies
- Estimate effort and consider schedules and technical approaches
- Provide technical guidance and support to the development team

Required Skills

Required Skills and Experience

The candidate must be able to communicate independently with customers

in Japanese, accurately understand and organize requirements, and lead

technical discussions.

- 12+ years of software development experience
- 5+ years of hands-on Java development experience
- 5+ years of experience as a Technical Lead / Team Lead
- Java 11, JSP, Servlet, Spring MVC
- Solid knowledge and experience with SQL, Oracle, and RDBs
- Experience with legacy and enterprise systems
- Experience in requirements analysis and effort estimation

Preferred Skills and Experience

- Experience with enterprise system enhancement projects
- Git and/or SVN

Company Description
