Job Description

COMPANY OVERVIEW

Our client is a dynamic and fast-paced SaaS company operating across the APAC region, where technology is a key driver of business success. The company is focused on scaling its platform, accelerating AI adoption and strengthening its engineering organization to support continued expansion and product innovation.

JOB RESPONSIBILITIES

- Define and execute the company's technology vision, strategy, and roadmap in alignment with business objectives.
- Lead and oversee all aspects of software engineering, architecture, infrastructure, security, and product technology development.
- Champion the adoption of AI and emerging technologies to enhance products, customer experience, and operational efficiency.
- Drive innovation and ensure the delivery of scalable, reliable, and high-performing SaaS solutions.

- Partner closely with executive leadership and cross-functional teams to align technology initiatives with commercial goals.
- Build, mentor, and retain high-performing engineering and technology teams, fostering a culture of collaboration, accountability, and continuous improvement.
- Evaluate industry trends, market developments, and new technologies to maintain a competitive advantage and support business growth.
- Establish best practices across software development, engineering operations, and technology governance.

JOB REQUIREMENTS

- Proven experience in a senior technology leadership role such as CTO, VP Engineering, Head of Engineering, or Engineering Director within a SaaS (Software-as-a-Service) company.
- Strong track record of building, scaling, and leading engineering teams in a SaaS environment.
- Deep understanding of SaaS product development, cloud architecture, platform scalability, security, and software delivery best practices.
- Extensive experience in software engineering, technology strategy, and product innovation.
- Demonstrated success in driving technology roadmaps that support business growth, customer acquisition, and product expansion.
- Strong interest in AI, machine learning, and emerging technologies with experience applying them to enhance products or business operations.
- Excellent leadership, stakeholder management, and communication skills.
- Strategic mindset with the ability to align technology initiatives with commercial and organizational objectives.
- Experience working in high-growth, international, or multi-market SaaS organizations is highly preferred.
