Job Description

Company Overview

Our client is a fast-growing industrial recycling and metal recovery company specializing in the collection, processing, trading, and recycling of ferrous and non-ferrous metals. With a strong presence in Malaysia's manufacturing and industrial sectors, the company supports sustainability initiatives by transforming industrial scrap and recyclable materials into valuable resources for the circular economy.

As part of its expansion plans and facility growth, the company is seeking a hands-on operations professional to oversee daily yard activities, optimize workflows, and lead operational teams to ensure safe, efficient, and productive operations.

Key Responsibilities

- Supervise day-to-day yard operations and allocate manpower based on operational priorities.

- Plan and coordinate receiving, unloading, sorting, grading, storage, processing, loading, and dispatch activities.
- Ensure proper identification, segregation, labeling, and storage of ferrous and non-ferrous metals.
- Monitor various scrap materials including mild steel, stainless steel, aluminium, copper, brass, cables, and other recyclable industrial metals.
- Identify material contamination, mixed grades, foreign materials, and incorrect classifications.
- Coordinate truck movements, loading schedules, and unloading activities to improve yard efficiency.
- Monitor inventory locations and support accurate stock control and reporting.
- Enforce company SOPs, safety requirements, PPE compliance, and environmental standards.
- Monitor workforce productivity, attendance, discipline, and overall performance.
- Support management in implementing operational improvements and facility expansion activities.
- Prepare operational reports and provide regular updates to management.

Requirements

- Minimum 5 years of operational experience within scrap metal, recycling, steel, foundry, metal processing, industrial waste, demolition, heavy manufacturing, or related industries.
- Previous experience leading or supervising blue-collar operational teams.
- Good understanding of yard operations, material movement, loading and unloading processes.
- Knowledge of ferrous and non-ferrous scrap materials including steel, stainless steel, aluminium, copper, and brass is highly advantageous.
- Experience in scrap segregation, grading, inventory management, and material recovery processes.
- Familiarity with workplace safety practices and industrial operating procedures.
- Able to communicate effectively with operators, drivers, contractors, warehouse personnel, and management.
- Basic knowledge of inventory records, reporting, and operational documentation.
- Proficiency in Bahasa Malaysia; ability to communicate in English and/or Mandarin will be an added advantage.
- Possession of forklift, machinery operation, safety, or technical certifications will be beneficial.
