Job Description

POSITION TITLE　Staff Mobile Software Engineer

POSITION SUMMARY

In this position, you will help define the technical vision, architecture, and development strategy for next-generation mobility companion applications and related services, leading the delivery of scalable mobile experiences across iOS and Android platforms.

RESPONSIBILITIES

- Develop a cross-platform mobile application using Kotlin Multiplatform
- Build and maintain iOS applications with SwiftUI and Android applications with Jetpack Compose

- Collaborate closely with product managers, designers, backend engineers, and cross-functional teams
- Participate in product definition and design discussions
- Lead technical discussions, architecture reviews, and feature development initiatives
- Define technical roadmaps and long-term architectural direction
- Drive system design and break down complex problems into executable development tasks
- Build prototypes to validate new ideas and technical feasibility
- Promote unit testing and integration testing best practices
- Design APIs and SDKs with external stakeholders
- Improve observability and support non-functional requirements
- Support software development processes within a highly regulated and safety-focused industry

QUALIFICATIONS

- 7+ years of experience developing customer-facing applications at scale
- Experience delivering software from concept through production
- Strong coding practices with a focus on maintainability and readability
- Experience with asynchronous programming, multithreading, dependency injection, and reflection
- Proven ability to mentor engineers through code reviews and technical guidance
- Positive team player with strong ownership and collaboration skills

LOCATION Mountain View, California (Hybrid)

SALARY USD 200,000-230,000

BENEFITS Medical, dental, vision, 401K
