## Job Description

**Who are you**:

- You are a technically minded professional with experience in systems engineering, infrastructure, application support or a related IT role.
- You enjoy troubleshooting problems, improving systems and learning new technologies.

- You are looking for an opportunity to broaden your technical skills and work alongside experienced engineers.

**Why you should apply:**

1. Expand your skills across systems engineering, infrastructure and automation.
2. Work with Linux, Python scripting and business-critical applications.
3. Collaborate with experienced engineers on technical projects and system improvements.
4. Gain exposure to financial technology and data-intensive systems.
5. Develop your technical expertise in a collaborative, fast-moving environment.
6. Previous financial services experience is not essential.

## Required Skills

**Requirements:**

1. Experience in systems engineering, infrastructure support, application support or a related technical role.
2. Familiarity with Linux environments and command-line operations.
3. Understanding of servers, networking and infrastructure fundamentals.
4. Python scripting experience or a strong interest in automation.
5. Good troubleshooting, problem-solving and communication skills.
6. A proactive attitude and willingness to learn.

**Desired skills:**

- Experience with AWS, Azure or Google Cloud Platform.
- Familiarity with Docker, Kubernetes or CI/CD pipelines.
- Exposure to financial technology, trading systems or market data.
- A degree or background in Computer Science or a related field.
- Japanese and English communication skills.
- An interest in scalable infrastructure and high-performance systems.
