Job Description

OutSystems Developer - Low Code Engineer (Consultant / Senior Consultant) - 1 Year Fixed ContractAbout the Opportunity
My client, a well-established technology consulting and digital transformation organization, is looking for experienced **OutSystems Developers** / **Low Code Engineers** to support and modernize a business-critical Singapore public sector platform.

This role involves application development, production support, system enhancements, troubleshooting, and modernization initiatives within a large-scale enterprise environment.

Key ResponsibilitiesApplication Development

- Develop and enhance applications using **OutSystems**.
- Build and maintain business workflows, integrations, and application logic.
- Support frontend functionality and content management components.
- Develop and maintain **Oracle Database** objects, queries, and stored procedures.

Production Support

- Resolve application defects, incidents, performance issues, and integration failures.
- Support deployments, releases, rollbacks, and post-deployment validation.
- Conduct root-cause analysis and implement permanent fixes.

Infrastructure & Integration

- Support applications hosted on **AWS**.
- Work with enterprise security, authentication, and identity integrations.
- Support enterprise-scale application environments and integrations.

Modernisation Initiatives

- Participate in migration and modernization projects.
- Support transition planning, technical assessments, testing, and cutovers.
- Ensure production stability during transformation initiatives.

Senior Consultant Responsibilities

- Lead technical delivery and engineering workstreams.
- Provide architecture and solution guidance.
- Manage technical risks, dependencies, and complex production issues.
- Mentor engineers and drive technical decisions.

Mandatory RequirementsConsultant

- Minimum **3 years' OutSystems development experience**
- Experience supporting production applications post go-live
- Hands-on **Oracle Database** experience
- Enterprise application development experience
- Experience delivering at least one **Singapore Government OutSystems project**

Senior Consultant

- Minimum **7 years' application development experience**
- At least **3 years' OutSystems experience**
- Technical leadership and solution architecture experience
- Experience leading system implementation, enhancement, migration, or modernization projects

Mandatory Technical Skills

OutSystems

Oracle Database

Production Application Support

Application Troubleshooting & Incident Resolution

Enterprise Application Development

System Enhancement & Maintenance

Preferred Skills

- Oracle Policy Automation (OPA) / Oracle Intelligent Advisor (OIA)
- Sitefinity CMS
- AWS (S3, EC2, Lambda, ELB, CodeDeploy, KMS)
- GitLab CI/CD or CodePipeline
- ADFS, SAML, WOG AD, CAM

- API Gateway
- Dynatrace, Datadog, CloudWatch
- Infrastructure & Security Practices
- Cloud Migration & Modernization Experience

Ideal Candidate
The strongest candidates will have:

- Strong **OutSystems** development experience
- Oracle Database expertise
- Hands-on production support experience
- Exposure to AWS-hosted enterprise applications
- Singapore Government project experience
- Large-scale application modernization experience
- Ability to support and enhance complex legacy systems while contributing to future-state architecture
