Job Description

Are you an experienced QA/QC professional with a strong background in M&E, HVAC or construction engineering? Looking for an opportunity to expand your regional exposure and drive quality excellence across multiple countries?

An established international engineering group is seeking a technically strong and hands-on Regional QA/QC & QEHS Assistant Manager to oversee quality, environmental, health and safety compliance across its overseas subsidiaries in ASEAN and India.

This is an excellent opportunity for a quality professional looking to broaden their experience beyond individual project responsibilities and contribute to regional quality standards and operational excellence.

Key Responsibilities

- Conduct regional quality, environmental and safety audits, site inspections and compliance assessments across overseas subsidiaries.
  Ensure adherence to ISO 9001, ISO 14001 and ISO 45001 standards, internal procedures and relevant specifications.
- Identify non-conformities, investigate quality issues and drive corrective and preventive actions.
- Review and strengthen QA/QC procedures, quality management documentation, audit records and reporting processes.
- Assess existing practices, identify operational gaps and recommend improvements to quality and QEHS management systems.
- Consolidate regional performance reports and communicate findings, risks and improvement actions to management.
- Collaborate with country teams to promote consistent quality standards, share best practices and strengthen QEHS capabilities.
- Support workflow digitalisation and process improvements to enhance operational efficiency and accuracy.

Requirements

- Diploma or degree in Mechanical Engineering, Electrical Engineering, Construction Engineering or a related discipline.
- 5–10 years of relevant QA/QC or Quality Management experience within the M&E, HVAC and/or construction industry.
- Strong understanding of quality management systems, including practical experience implementing or maintaining QMS requirements.
- Good working knowledge of ISO 9001, ISO 14001 and ISO 45001 standards.
- Experience conducting internal audits, site inspections, compliance assessments and corrective action follow-ups.
- Strong technical understanding of M&E engineering quality assurance and control practices.
- Willingness to undertake regional travel
