Job Description

Company Overview:

A leading multinational company specializing in the manufacturing and distribution of mechanical components, factory automation (FA) parts, tooling, mold and die components, and maintenance, repair, and operations (MRO) products. The company serves a wide range of industries, including electronics, semiconductor, automotive, machinery, and industrial manufacturing.

With a strong focus on innovation, MISUMI combines manufacturing expertise with advanced e-commerce, IT, and AI technologies to streamline procurement and production processes for its customers. The company is well-known for providing highly customizable industrial components with reliable quality, competitive pricing, and fast delivery capabilities

Job Responsibilites:

- Develop and maintain internal business applications and automation solutions.
- Build RPA workflows using Power Automate and UiPath.
- Automate manual processes to improve efficiency and productivity.
- Troubleshoot, debug, and support existing systems and applications.
- Work closely with business users to gather requirements and deliver technical solutions.
- Integrate systems using SQL, APIs, and scripting technologies.
- Support digital transformation and process improvement initiatives.
- Maintain technical documentation and ensure smooth system operations.

Job Requirements:

- Bachelor's Degree in Computer Science, Information Technology, Software Engineering, or a related field.
- 2-4 years of relevant working experience in application development, system development, automation, or digital transformation projects.
- Strong knowledge of **SQL**, including query optimization, database design, and stored procedures.
- Experience with backend development or scripting languages such as **Node.js, PHP**, or similar technologies.
- Good understanding of **REST APIs**, system integration, and data exchange between applications.
- Hands-on experience or exposure to **Power Automate**, **UiPath**, or other RPA/automation platforms.
- Strong analytical, problem-solving, and troubleshooting skills.
- Ability to translate business requirements into technical solutions and automation workflows.
- Experience working with business users and stakeholders to gather requirements and drive process improvements.
- Strong communication and interpersonal skills.
- Self-motivated, proactive, and eager to learn new technologies.
