Job Description

Key Responsibilities

- Perform soldering, de-soldering, and replacement of electronic components on PCBs.
- Conduct PCB-level repair and unit/module replacement for industrial electronic equipment.
- Support repair activities for products such as Inverters, Servo Amplifiers, PLCs, and related automation equipment.
- Follow repair procedures and technical instructions provided by senior technicians.
- Inspect repaired products and verify repair quality before release.
- Maintain a safe, clean, and organized working environment.

Qualifications

- Vocational Diploma, Higher Vocational Diploma, or Bachelor's Degree in Electronics, Electrical Engineering, Mechatronics, or a related field.

- Experience in soldering, PCB assembly, PCB repair, or electronics manufacturing is preferred.
- Basic knowledge of electronic components and circuit boards.
- Able to use soldering tools and perform component replacement.
- Good attention to detail and willingness to learn through hands-on OJT training.
- Able to communicate English / Chinese / Japanese to internal team.
