Job Description

Company Overview: One of the leading Japanese MNC into trading industry involved in installation and servicing support of industrial machineries for their manufacturing clients.

Job Overview: To strengthen the Automotive Paint Shop team by recruiting a Senior Engineer who can contribute to technical coordination, project execution support, and effective communication between Japanese stakeholders, customers, vendors, and internal teams.

Job Responsibilities:

- Coordinate technical activities for automotive paint shop projects, from engineering and planning through installation and commissioning support.
- Coordinate with customers, Japanese management, internal engineering teams, contractors, and equipment suppliers.

- Follow up on project schedules, technical submissions, site activities, and pending action items.
- Prepare and review technical documents, meeting minutes, progress reports, and presentations.
- Support troubleshooting, issue resolution, and coordination among project stakeholders.

Job Requirements:

- B.E. / B.Tech. in Mechanical Engineering from a recognized institution.
- Relevant experience in automotive paint shop projects, paint shop equipment, or automotive manufacturing systems.
- Working knowledge of mechanical systems such as HVAC, Air Supply Units (ASUs), ventilation, ducting, piping, and associated equipment is preferred.
- Ability to understand technical drawings, specifications, project schedules, and engineering documentation.
- Good verbal and written English communication skills.
- Ability to communicate clearly and professionally with Japanese colleagues and customers.
- Strong coordination, follow-up, reporting, and interpersonal skills.
- Experience working with Japanese companies or knowledge of the Japanese language will be an added advantage.
- Willingness to travel to customer sites and project locations, as required.
