Job Description

Company and Job Overview

Our client is a global leader in semiconductor manufacturing equipment, providing advanced process solutions to leading semiconductor manufacturers worldwide.

The company develops highly sophisticated equipment used in the production of advanced semiconductor devices and supports customers through a global network of engineering and service organizations.

As part of the continued expansion of semiconductor manufacturing in Europe, the company is strengthening its technical support team in Dresden.

Position summary

As a Field Service Engineer, you will be responsible for the installation, maintenance, troubleshooting, and optimization of

highly advanced semiconductor manufacturing equipment at customer facilities.

You will work closely with both customers and international engineering teams to ensure maximum equipment performance, reliability, and customer satisfaction.

Job Responsibilities

- Installation, start-up and qualification of semiconductor manufacturing equipment
- Preventive maintenance and repair activities
- Troubleshooting of electrical, mechanical and system-related issues
- Equipment upgrades and continuous improvement activities
- Root-cause analysis and technical problem solving
- Creation of service reports and technical documentation
- Close collaboration with customers and global support teams
- Compliance with safety and cleanroom standards

Job Requirements

- Degree, technical diploma or vocational qualification in Electrical Engineering, Mechatronics ,Mechanical Engineering, Semiconductor Technology, Physics, Related Technical Disciplines
- Experience in Semiconductor Equipment, Industrial Automation, Precision Machinery, Vacuum Technology,High-Tech Manufacturing Equipment

- Troubleshooting and problem-solving skills with the ability to diagnose technical issues.
- Ability to read and interpret technical drawings and specifications.
- Basic understanding of semiconductor manufacturing processes and equipment.
- Excellent communication and interpersonal skills to work effectively with customers and team members.
- Willingness to travel and work in shift system
- Valid driver’s license
