Job Description

The Project Manager will be responsible for leading and coordinating key stakeholders involved in large-scale energy infrastructure projects, including EPC contractors, equipment suppliers, local communities, and government authorities. This role requires a strong understanding of construction project delivery, particularly civil and electrical works, and the ability to manage complex projects through all stages of development and execution.

The successful candidate will play a critical role in driving project success through effective stakeholder management, risk mitigation, cost control, schedule management, and operational readiness. The position offers the opportunity to contribute to high-impact projects supporting the transition to a more sustainable and resilient energy system.

Key Responsibilities
Manage and coordinate EPC contractors, equipment suppliers, and other project partners.
Oversee project execution, including civil, electrical, and balance-of-plant construction activities.
Monitor and optimize project performance related to cost, schedule, quality, and safety.
Engage with local communities, municipalities, regulatory bodies, and other external stakeholders.
Identify, assess, and mitigate project risks throughout the project lifecycle.

Administer contracts and ensure compliance with project agreements and technical requirements.
Facilitate communication and alignment among internal and external stakeholders.
Drive projects through construction, commissioning, and commercial operation milestones.

Employee Benefits:
Health Insurance Employees' Pension Employment Insurance Industrial Injury Insurance

Required Skills

Qualifications:
1. Bachelor's degree in electrical engineering, civil engineering, energy management, or related field. Advanced degree is preferred.
2. Minimum of 5 years of experience in power system operations or dispatch in renewables energy, BESS and relevant power generation asset.
3. Technical knowledge of battery energy storage technologies, including lithium-ion batteries, control systems, and balance of plant components.
4. Extensive knowledge of Japanese construction industry
5. Strong communication and interpersonal skills, with the ability to collaborate effectively across diverse teams and stakeholders.
6. Fluency in Japanese is mandatory, and Fluency in English is preferred.
