Job Description

- Perform independent validation of models used within the banking business in accordance with the firm's model risk management framework.
- Assess model methodologies, assumptions, implementation, limitations, and performance from a model risk perspective.
- Support the development, enhancement, and implementation of model governance standards and processes.
- Contribute to the rollout and adoption of model risk management practices across a broad range of models.
- Conduct quantitative analysis using programming tools to support validation and risk assessment activities.
- Work closely with stakeholders across risk, compliance, and business functions to establish effective governance and controls.
- Assist in identifying, monitoring, and reporting model-related risks and remediation actions.
- Support initiatives designed to align model risk management practices with evolving domestic and international regulatory expectations.

Employee Benefits:
Social insurance and statutory benefits in accordance with Japanese law. Additional benefits are available and can be discussed during the recruitment process.

Required Skills

- Master's degree or equivalent academic background in a STEM discipline, including Mathematics, Statistics, Computer Science, Data Science, Engineering, Physics, or a related quantitative field.
- Hands-on experience conducting quantitative analysis using programming languages such as Python, R, VBA, or similar tools.
- General understanding of risk management and/or compliance functions within financial institutions, including areas such as market risk, credit risk, operational risk, or liquidity risk.
- Ability to prepare documentation and communicate effectively in English with global stakeholders.
- Strong interpersonal and stakeholder management skills, with the ability to work across different teams and perspectives.
- A collaborative and proactive approach to driving discussions, building consensus, and supporting project delivery.
