Job Description

[Put your English skills to good use!] App development engineer (member) for pharmaceutical companies / Technical training provided / Hybrid work schedule

■About NEXGEN
: Leveraging our global network, including our base in India, we provide technology resources such as cloud, IoT, and AI to major foreign companies. Our team

of approximately 200 engineers and sales representatives work together to provide dispatch, contract development, and offshore development services. We offer a wide range of solutions, primarily focusing on SAP, Web, and cloud technologies. Both Japanese and English are used within the company, fostering a casual and open work environment.

■Key points of this project
: - You can use your English skills in a work environment where you can use English on a daily basis
. - There will be 1-2 months of technical training in English after joining, so you can start with confidence even if you have no experience in the industry.
- You can participate in the launch of a new team of 15 people, including PMs and TLs.
- Remote work is possible 1-2 days a week.

■Why not start with a casual chat?
We welcome you even if you're still undecided about applying, such as "I want to work using my English skills" or "I'd like to hear more about the team."
We also offer casual online interviews, so please feel free to contact us.

Required Skills

■Job Description:
You will be responsible for the development and maintenance of applications for pharmaceutical companies.
These systems manage everything from pharmaceutical manufacturing to shipment.
As a team member, you will be responsible for development work under the guidance of a Project Manager (PM) and Team Leader (TL).

■Development Environment
: C#.NET
, Node.js, Angular, React

■Required Skills
: • Development experience (language and years of experience are not specified)
• Bilingual (TOEIC score of 800 or higher, or ability to use English in a professional setting)

■ Desired skills
: ・Experience developing with C#
・Experience developing with front-end technologies such as Angular and React

■Working conditions
and location: Tamachi (hybrid work, 1-2 days remote per week)
Duration: Immediate start - Long-term
Industry: Medical devices and pharmaceuticals
