Job Description

Location
Vientiane, Laos

Company Overview
A leading diversified business group driving growth through technology, operational excellence, and digital innovation across multiple industries.

Job Responsibilities

- Define and execute the company's IT vision, ensuring technology initiatives support business objectives and future expansion.
- Manage enterprise-wide infrastructure, networks, systems, and technical support functions to maintain high service

availability and reliability.

- Oversee cybersecurity programs, including risk mitigation, incident response, system protection, and user access governance.
- Lead software engineering and application delivery activities, ensuring projects are completed on time and meet quality standards.
- Establish robust IT governance, documentation standards, procedures, and compliance controls across the organization.
- Develop and maintain business continuity and disaster recovery strategies to minimize operational disruption.
- Direct and mentor IT managers, engineers, developers, and support personnel while fostering continuous learning and technical excellence.
- Champion digital transformation, workflow optimization, and automation initiatives to enhance organizational productivity.
- Drive enterprise architecture improvements, data management practices, and long-term technology modernization plans.
- Monitor IT spending, manage departmental budgets, and ensure optimal utilization of technology investments.
- Partner with vendors and service providers on technology procurement, implementation, and ongoing support.
- Collaborate closely with business stakeholders to align technology delivery with operational and strategic priorities.
- Provide executive management with regular updates on technology performance, project milestones, security risks, and improvement opportunities.

Job Requirements

- Bachelor's Degree in Information Technology, Computer Science, Engineering, or a related field.
- Master's Degree and/or professional certifications such as PMP, ITIL, CISSP, or equivalent credentials would be an advantage.
- 8 to 12 years of progressive experience in information technology, including a minimum of 4 years in a senior leadership capacity.
- Strong expertise in enterprise infrastructure, cybersecurity, software development, and technology operations.
- Proven experience leading technology transformation, system implementation, automation, or digitalization programs.
- Unnderstanding of IT governance frameworks, budget management, procurement processes, and vendor oversight.
- Demonstrated ability to lead cross-functional technical teams and build a high-performance culture.
- Excellent stakeholder management, communication, and influencing skills with senior leadership exposure.
- Strong business acumen, analytical thinking, and problem-solving capabilities.
- Professional working proficiency in English.

Benefits

- Attractive salary package with performance-based rewards.
- Company-sponsored accommodation allowance.
- Premium healthcare and medical insurance coverage.
- Work visa and relocation support provided.
- Annual return flight ticket to home country.

- Career progression opportunities within a growing regional organization.
- Exposure to enterprise-scale digital transformation and strategic technology projects.
- Dynamic, collaborative, and multicultural working environment.
- Comprehensive expatriate support package and long-term career development opportunities.

Due to the high volume of applicants, we regret to inform that only shortlisted candidates will be notified. Thank you for your understanding.
