Job Description

Company and Job Overview

Our Japanese client is a global manufacturer specializing in gas detection and industrial safety solutions. The company serves customers across the semiconductor, chemical, energy, and manufacturing sectors and is expanding its technical support capability in the Dresden area.

Job Responsibilities

- Perform preventive and corrective maintenance on fixed and portable gas detection systems
- Carry out calibration, functional testing, sensor replacement, and system inspections
- Troubleshoot equipment malfunctions and implement corrective actions
- Provide on-site technical support and customer assistance
- Verify system performance and compliance with customer and safety requirements

- Prepare service reports and maintenance documentation
- Support customers primarily in the semiconductor industry, as well as in chemical, energy, and manufacturing environments
- Participate in an on-call rotation and occasional support activities outside normal working hours

Job Requirements

- Degree or technical qualification in Electrical Engineering, Electronics, Mechatronics, Automation, Instrumentation, or a related technical discipline
- Experience as a Field Service Engineer, Service Engineer, Maintenance Engineer, or Technical Support Engineer
- Hands-on experience in installation, commissioning, maintenance, troubleshooting, and repair of industrial equipment
- Strong diagnostic and problem-solving skills
- Experience working directly with customers in a technical support environment
- Good German and English communication skills
- Valid driver's license and willingness to travel

Preffered Requirements

- Gas detection systems
- Analytical or measurement equipment
- Industrial instrumentation and process control systems
- Semiconductor manufacturing equipment
- Vacuum systems, gas delivery systems, or abatement systems
- Cleanroom environments
- Sensor technologies and calibration procedures

What Our Clint Offers

- Opportunity to support a major semiconductor project in Dresden
- International and technology-driven working environment
- Comprehensive product and technical training
- Competitive compensation package
- Long-term career development opportunities
