Job Description

Job Summary:

- Join a global IT Security team and help protect a world-leading semiconductor technology company.
- Support and enhance enterprise security across endpoints, identities, networks, and cloud environments.
- Work with industry-leading security tools including EDR/XDR, SIEM, SOAR, IAM, and Active Directory.
- Drive vulnerability management, threat detection, and proactive threat hunting initiatives.
- Participate in incident response and digital forensics investigations to strengthen cyber resilience.
- Contribute to emerging security areas including AI Security and Operational Technology (OT) Security.
- Collaborate with global IT and security teams, including international stakeholders in an English-speaking environment.

If you know anybody who could be a good fit for the role, please feel free to refer them **here** until November 19th and earn 150,000JPY when we're able to place them.
