Job Description

❖Serve as the technical lead for global hybrid cloud and data center infrastructure across Azure, AWS, and on-premise environments.
❖Provide expertise and governance across virtualization, storage, backup, server, and data center technologies.
❖Drive automation, standardization, and operational excellence through IaC, PowerShell, Python, and modern infrastructure practices.
❖Lead initiatives to improve infrastructure performance, availability, scalability, resilience, and capacity management.
❖Support cloud migration, platform modernization, and data center transformation programs.
❖Act as the escalation point for major incidents, complex troubleshooting, and root cause analysis.
❖Ensure compliance with security, disaster recovery (DR), business continuity (BCP), and enterprise governance requirements.
❖Partner with global IT teams, vendors, and stakeholders to enhance service quality and support worldwide digital transformation journey.

If you know anybody who could be a good fit for the role, please feel free to refer them **here** until November 19th and earn 150,000JPY when we're able to place them.
