Job Description

Job Summary (Generalized)
A field-based engineering role responsible for supporting technical project delivery across maintenance, inspection, installation, and modification work at industrial or infrastructure sites. The role involves hands-on execution, stakeholder coordination, and ensuring safety, quality, and project success.

Key Responsibilities

Provide technical support across all project phases (preparation, execution, and completion)
Perform on-site activities such as inspections, maintenance, installation, and troubleshooting
Act as a liaison between engineering teams, suppliers, and customers
Support project planning, coordination, and execution in collaboration with cross-functional teams
Prepare and manage project documentation (reports, procedures, technical records)
Ensure compliance with safety, quality, and regulatory requirements
Serve as the primary point of contact for customer communications
Participate in site-based work, including travel and extended on-site assignments

Employee Benefits:
・健康保険、雇用保険、労災保険、厚生年金

Required Skills

Qualifications (Generalized)

Degree in Engineering or related technical field
Experience in industrial, energy, or infrastructure projects
Strong hands-on engineering and troubleshooting skills
Ability to work both independently and within cross-functional teams
Strong communication skills for technical and customer-facing interactions
Business-level proficiency in English and the local language

Preferred Skills

Experience in large-scale plant or infrastructure environments
Knowledge of safety standards, regulations, and quality systems
Background in field services, commissioning, or technical support
Ability to manage multiple projects and adapt to changing environments
