Job Description

As a Field Engineer (Inspection Systems), you will be responsible for the installation, commissioning, troubleshooting, maintenance, and optimization of inspection systems used throughout beverage production lines.

This role offers the opportunity to work with advanced vision inspection, automation, and digital manufacturing technologies while supporting customers in maintaining high production quality and operational performance.

■Key Responsibilities
-Install, commission, and optimize inspection systems for beverage production lines.
-Perform troubleshooting, maintenance, and repair of inspection equipment.
-Configure and adjust inspection parameters for new products and packaging formats.
-Support image processing, sensor-based inspection, and quality verification systems.
-Conduct electrical, automation, and network diagnostics.
-Collaborate with customers, contractors, and global engineering teams.
-Support preventive maintenance, upgrades, and modernization projects.
-Participate in domestic and international service activities as expertise develops.

Employee Benefits:
-Competitive compensation package
-Performance-based bonus program
-Annual salary review
-Permanent employment
-Flexible working hours system
-Comprehensive social insurance coverage
-Opportunity to work with advanced inspection, automation, and vision technologies
-International and collaborative working environment
-Overseas technical training opportunities
-Professional development and technical certification support
-Career growth opportunities within a global industrial technology organization
-Exposure to automation, IIoT, manufacturing digitalization, and quality control solutions
-Smoke-free workplace
-Overtime typically ranging from approximately 20?30 hours per month
