## Job Description

**Location** Tokyo, Japan

**Job Type** Permanent full-time

**Work Style** Hybrid

**Japanese** Native-level proficiency

**English** Business level

**Education** Bachelor's degree in a relevant field

Support Japan-focused satellite operations for a global Earth observation company. You'll coordinate customer requests, track imagery collection and delivery, and help interpret geospatial information in a time-sensitive operations environment.

**Responsibilities**

- Coordinate satellite imaging requests with mission planning and operations teams.
- Monitor collection progress, delivery timelines, and changes in customer priorities.
- Review imagery and geospatial products and prepare concise reports for internal and customer stakeholders.
- Communicate status to Japan-based customers and coordinate with engineering and operations teams.
- Improve operating procedures and support training and knowledge sharing.

**Work Conditions**

- The role may involve flexible schedules or shift rotations.

Apply through CareerCross.

## Required Skills

**Required Qualifications**

- Relevant experience in intelligence, surveillance and reconnaissance (ISR), geospatial intelligence, satellite operations, remote sensing, or defense or security operations.
- Bachelor's degree in geospatial intelligence, remote sensing, engineering, defense studies, computer science, or a related field.
- Ability to interpret geospatial information, solve problems, and work in a fast-paced operations setting.
- Native-level Japanese and business-level English.
- Eligibility to obtain Japanese security clearance or equivalent, and a valid Japanese driver's license.

**Preferred Qualifications**

- Experience with synthetic aperture radar imagery, GIS tools such as ArcGIS or QGIS, or geospatial imagery analysis software.
- Engineering, software, military, defense, intelligence, or law enforcement experience.
- Experience supporting Japanese government or security organizations, or working in a 24/7 operations center.
- Familiarity with maritime domain awareness, disaster response, or border security.
