## Job Description

**Location** Toyohashi, Aichi, Japan

**Job Type** Permanent full-time

**Work Style** On-site, five days a week

**Industry** Automotive

**Experience** 5+ years in the automotive industry

**Japanese** Able to coordinate with local vendors in Japanese

**English** Strong advantage

Help a global automaker get vehicles ready for delivery at its Vehicle Processing Center in Toyohashi. Oversee production planning, completion inspections and repair quality while coordinating with service providers and internal teams.

**Responsibilities**

- Plan vehicle processing, track progress and delivery timing, and report on quality and operational performance.
- Oversee completion inspections, sampling, certificate issuance and recordkeeping. Maintain inspection equipment and support vehicle safety and regulatory audits.
- Guide technicians through difficult diagnoses and repairs, follow issues through to resolution and improve repair processes and costs.
- Supervise external providers, negotiate improvements and coordinate with other departments.

**Work Conditions**

- The Toyohashi facility is on-site five days a week. Public transport options are limited and staff typically commute by car.

Apply through CareerCross.

## Required Skills

**Required Qualifications**

- Five or more years of automotive industry experience.
- Grade 2 or higher automotive mechanic qualification, or substantial hands-on experience for consideration on a case-by-case basis.
- Knowledge of completion inspections, vehicle safety standards, production and process management, and quality improvement.
- Ability to coordinate and negotiate with providers and colleagues in Japanese, plus basic computer skills.

**Preferred Qualifications**

- English communication skills are a strong advantage.
- Advanced computer or data analysis skills, or knowledge of vehicle homologation.
