Job Description

What You'll Do

- Build and enhance modern web experiences using **React, Next.js, Vue.js, TypeScript, HTML, CSS, and JavaScript**
- Partner with Product Managers, Designers, and Engineers to deliver intuitive user experiences
- Drive product improvements through **A/B testing, UX research, and data-driven decision making**
- Take ownership of frontend features from concept through release
- Contribute to scalable, high-performance web applications within a large consumer platform

What We're Looking For

Strong frontend development experience with modern JavaScript frameworks

Experience with TypeScript, responsive UI development, and web performance optimization

Product-minded engineers who are passionate about user experience

Experience with SPA, SSR, or PWA development is a plus

Language & Location

- **No Japanese language skills required**
- Based in **Tokyo**
- International candidates are welcome
- Ideally seeking candidates who have worked in Japan before or have a good understanding of Japanese business culture and customer expectations

Company Description

Our client is a leading digital technology and financial services organization that develops products used by millions of consumers. The company operates a large-scale ecosystem of online and mobile services, delivering seamless experiences across payments, commerce, and consumer platforms.

With a strong focus on innovation, user experience, and technology-driven growth, the organization builds products that are deeply integrated into users' daily lives. Engineering teams work on high-traffic applications, leveraging modern technologies and data-driven decision-making to create scalable, customer-centric solutions.

The company offers a collaborative and international environment where engineers, product managers, and designers work closely together to solve complex challenges and deliver impactful products at scale. This is an opportunity to contribute to services that reach a large user base while working with modern technologies and experienced cross-functional teams.
