Job Description

Company Overview: One of the leading Japanese MNC that specializes in in high-precision dispensing systems.

Job Overview: The role will ensure smooth installation, operation, and customer support of dispensing systems, as well as strengthen distributor training and customer engagement as business expands.

Job Responsibilities:

- Conduct technical training and education for local distributors to ensure proper product understanding and usage.
- Perform testing operations using equipment in an internal lab environment, including validation of applications and process optimization.
- Support installation and commissioning of equipment at customer factories across India, ensuring successful startup

and handover.

- Handle troubleshooting, repair, and preventive maintenance of systems at customer sites.
- Work closely with sales, distributors, and customers to provide technical consultation and application support.
- Prepare technical reports and provide feedback to headquarters for continuous product improvement.

Job Requirements:

- Engineering graduate (Mechanical / Electrical or related field) with 3 - 10 years of experience working providing technical support, testing, maintenance, installation, commissioning for high-precision dispensing systems preferably from manufacturing, industrial equipment, automation, or dispensing systems.
- Must have strong experience in facing customers, understanding their challenges and providing solution.
- Strong curiosity and willingness to learn new technologies
- Good problem-solving skills and hands-on technical capability
- Effective communication skills in English
- Ability to work independently in a startup environment.
- Must be flexible for travelling within India and potentially overseas for training.
