Job Description

Job Description

- Respond promptly to customer complaints and ensure thorough root cause analysis, corrective actions, and preventive measures to prevent recurrence.
- Maintain and continuously improve the Quality Management System (QMS) in compliance with IATF 16949 and ISO 9001 standards.
- Develop and mentor Supervisors, Team Leaders, and QC staff, strengthening the organization's quality management capabilities.
- Collaborate closely with Production and Manufacturing Engineering departments to drive quality improvement projects and enhance manufacturing processes.
- Analyze quality data and improve Quality KPIs, identifying trends, risks, and opportunities for performance enhancement.
- Ensure strict adherence to work instructions and inspection standards, while strengthening overall quality control systems and procedures.
- Oversee quality management for both day and night shifts, including prompt response and resolution of quality issues occurring during night-shift operations.

Qualification

- Minimum 5 years of experience in Quality Control (QC) and Quality Assurance (QA) within a manufacturing environment, including at least 2 years of management experience.
- Industry experience in Automotive Parts, Wire Harnesses, Cable Processing, Electrical Wiring, or Electronic Components Manufacturing is highly preferred.
(Automotive is essential / Any Automotive products okay)

- Proven leadership and people management skills with experience overseeing QA/QC departments and driving quality improvement initiatives.
- Strong knowledge of quality management systems and tools, including IATF 16949, ISO 9001, 5 Why Analysis, 8D Problem Solving, and the Seven QC Tools.
- Experience in quality assurance activities, including customer complaint handling, root cause analysis, corrective actions, and preventive actions (CAPA) to prevent recurrence.
