Job Description

Company and Job Overview

Our client is a leading Japanese technology company providing advanced environmental and process-related equipment to the semiconductor industry.

To support the rapid growth of semiconductor manufacturing in Europe, the company is expanding its service organization in Dresden, Germany and is looking for Taiwanese engineers interested in building a long-term career in Germany.

As a Field Service Engineer, you will be responsible for supporting semiconductor customers through equipment installation, commissioning, troubleshooting, maintenance, and technical service activities.

You will work closely with engineering and technical teams across Germany, Taiwan, and Japan while supporting one of Europe's most important semiconductor ecosystems.

Job Responsibilities

- Installation and commissioning of semiconductor-related equipment
- Support equipment startup and qualification activities
- Perform preventive and corrective maintenance
- Diagnose mechanical, electrical, pneumatic, and process-related issues
- Troubleshoot equipment failures and implement corrective actions
- Conduct equipment modifications and upgrades
- Prepare service reports and technical documentation
- Manage spare parts inventory and maintenance records
- Provide technical support and customer training
- Coordinate with engineering teams in Germany, Taiwan, and Japan
- Ensure compliance with customer safety and quality requirements

Job Requirements

- Taiwanese nationality
- Experience in the semiconductor industry, Equipment installation, commissioning, maintenance or troubleshooting experience
- Fluent English
- Willingness to relocate to Dresden, Germany

Preferred Requirements

- Experience supporting TSMC, ESMC, ASE, SPIL, KYEC, UMC, VIS or similar semiconductor environments
- Semiconductor fab experience
- Experience working with semiconductor manufacturing equipment
- German language skills are welcome but not required
