Job Description

As a Technical Lead (Java) in Tokyo, you will develop and maintain application solutions for the Technology & Telecoms industry. You will work within the Technology department to keep checkout-related applications reliable and fit for business use.

Client Details

The organisation operates in the Technology & Telecoms industry in Tokyo.

Description

- Develop application features for checkout-related services, helping maintain clear and reliable user flows.
- Maintain existing applications by investigating issues and applying practical fixes.
- Review application behaviour and make improvements that support stable day-to-day operation.
- Work with technology colleagues to clarify technical needs and deliver suitable application changes.
- Test application updates before release to help confirm that functions work as intended.

- Document application changes and technical details to keep development work clear and traceable.
- Monitor application performance and address technical issues that affect service use.
- Contribute to ongoing improvements in checkout application design and delivery.

Job Offer

- Temporary contract.
- Hourly salary of JPY 4,000 to JPY 4,700.
- Free meals at the cafeteria.
- Location: Tokyo.

Required Skills

A successful Technical Lead (Java) should have:

- Experience developing and maintaining business applications.
- Ability to investigate application issues and identify practical solutions.
- Knowledge of application testing and release checks.
- Ability to review existing code and improve application reliability.
- Experience documenting technical work and application changes.
- Ability to work on checkout-related application functions within a Technology team.

Company Description

Michael Page Japan is a professional recruitment consultancy that specializes in placing mid-to-senior level professionals in permanent, contract, and temporary positions for both Japanese and multinational companies. It operates across various sectors, leveraging its global expertise and local market knowledge to provide tailored recruitment solutions.
