Job Description

Lead large-scale power electronics development projects for automotive electrification applications, ensuring alignment with quality, cost, delivery, and budget objectives.
Manage overall project planning, progress tracking, risk management, and issue resolution throughout the product development lifecycle.
Act as the primary interface between customers, development centers, and internal stakeholders to ensure smooth project execution.
Coordinate and lead global project teams across multiple international locations to achieve project milestones and deliverables.
Drive technical and project-related problem-solving activities, proactively identifying challenges and implementing effective solutions.
Build and maintain strong relationships with customers and internal management to support long-term business growth.
Contribute to the successful development and launch of next-generation electrification solutions for global markets.

Employee Benefits:
Flexible and mobile working arrangements.

Extensive training and development programs including structured learning, coaching, mentoring, and educational leave
Transportation support including public transport options, bicycle leasing, and parking facilities
Subsidized meals at on-site dining facilities
Support services including social counselling and childcare coordination
Secure bicycle and motorcycle parking facilities

Required Skills

Minimum five years of experience in the automotive industry.
Business-level proficiency in both Japanese and English.
Experience managing complex product development projects or customer-facing development programs.
Strong project management skills, including planning, progress management, risk management, and issue management.
Excellent presentation, communication, and negotiation skills.
Proven ability to resolve complex technical and project-related challenges.
