Job Description

Our client is a specialty connectivity manufacturing company that designs and produces critical electronic components to solve complex high-density and high-speed connection challenges for leading Original Equipment Manufacturers (OEMs). Join them now to be a part of an ever-growing team!

Job Descriptions

- Responsible for engineering process development and control for new transfer projects as well as sustaining activities.
- Ensure production equipment and automated systems are stable, reliable, and capable of consistently meeting production, quality, and cycle-time requirements.
- Support, optimize, and troubleshoot vision inspection and Automated Optical Inspection (AOI) systems, including inspection setup, parameter optimization, defect detection, and false-reject reduction.
- Provide technical guidance and support to technicians in equipment troubleshooting, root-cause analysis, corrective

actions, and preventive maintenance to minimize equipment downtime.

- Ensure the products are built within the specification; ensure machines and equipment are running optimally and cost effectively.
- Implement Lean Manufacturing operations and systems to improve production rates and efficiency, and reduce waste.
- Work with Quality and Production teams on customer complaints and provide effective solutions to ensure customers' concern are addressed and resolved effectively.
- Keep workplace safe and healthy by ensuring that policies and safety procedures are followed.

Job Requirements

- Bachelor Degree in Engineering, preferably in mechanical or Electrical & Electronics engineering or equivalent.
- Min 5 years' of relevant working experience in manufacturing environment.
- Knowledge and hands-on experience with vision inspection / AOI system.
- Strong equipment troubleshooting and problem solving skill with the ability to guide technicians in resolving mechanical, electrical, control and process related equipment issues.
- Experience in cable and connector industry will be an added advantage.
- Knowledge of molding process is an added advantage.
- Good in the skill of data analysis and statistical aptitude.
