Job Description

Lead transformation across the assembly manufacturing industry.

This senior leadership role is for a consulting professional who combines deep manufacturing expertise with technology insight. Shape business and operational strategy, apply IT and AI to strengthen competitiveness, and guide complex programs from concept through delivery. You will also help grow a rapidly expanding consulting practice through client development, service innovation and team leadership.

Key responsibilities
• Advise executive and functional leaders on business strategy, operational transformation and IT/AI strategy.

• Lead complex engagements, overseeing delivery quality, risk, outcomes and senior stakeholder relationships.
• Develop client opportunities, proposals, consulting services and cross-sell opportunities.
• Build and coach project teams; improve consulting methods and share industry insights.

Why this role
Bring technology, engineering and manufacturing expertise together to deliver practical change from strategy through implementation. Shape a growing consulting practice and its services while collaborating with global colleagues.

Location and working style
The main locations are Kawasaki and Tokyo. Flexible working hours and hybrid/remote work are available, with client visits and travel depending on project needs.

Required Skills

Required
• Consulting experience
• IT experience and knowledge
• Deep expertise in at least one area of assembly or process manufacturing
• Native-level Japanese

Preferred
• Project management and/or PMO experience
• English literacy (approximately TOEIC 500)
