募集要項

We are a Global Company with a diverse environment where you can build a solid career as a system engineer.

We are a global company with a diverse environment where you can build a solid career as a system engineer.

We create services in a wide range of fields as the core.

Not only provide technical support but also undertake to contract prime projects and in-house development in growth fields.

Regarding in-house development, by establishing a business company, we have grown the business so that we can consistently build a career as an engineer in our group.

[Job Responsibility]

As a system engineer, you will be responsible for both in-house and outsourced projects.

Technical support, contract development, and handling the upstream processes such as specification review and requirements definition to design, manufacturing, testing, and sometimes maintenance and operation.

スキル・資格

[Required skills/ experience]

At least 1+ years of experience as a JAVA developer

[Welcoming skills]

PHP, C++, Perl, Python

会社説明

IT JOBS in Japan 日本で働くITエンジニアと企業を繋ぐエージェントサービス

～FIND YOUR NEXT IT ROLE in Japan～

Creating a society where people from abroad can play an active role in Japan through their IT skills.

We support you in IT-related job search in Japan, learning Japanese language, and work VISA.

If you come from a Unicorn company or a start-up you are welcome here. We are a team with our own unique and definitive characteristics in an agile environment.

We believe in modern solutions and a modern work environment. When you come to the office let's eat lunch prepared by us!

There are your consultants to support your career advancement! You can have an interview in English as well.
